TEXAS HAYNET

Little Thunder Stables, Inc.

The Texas Haynet is the answer to many horse owners prayers! Hay has become so expensive, you are limited to how many horses you can have in your life. With a net around your hay bale, your hay will last from 30 % longer to twice as long...in one case, a lady reported her hay lasted 3 times as long!

It depends on the personality of your horse and the taste of the hay. Really fresh, green, sweet hay is eaten faster, of course, than dried, yellow hay from last year. Certain horses are more food aggressive than others and eat faster than others. Cold weather?- more consumption! Working horse? - more fuel needed!

*Many factors determine how long this net will expand the life of your round bale! The fact is, your bale will definitely last **much longer!***

Your horse will learn quickly how to carefully extract small bites of hay from the net.

You will no longer find huge piles of hay on the outside of the hay ring!

(You know the loose hay piles I am talking about... the ones they love to pee on!)

ADVANTAGES!

- **SAVES MONEY !**
- **SLOWS THE DIGESTION.**
- **ALLOWS THE LIVER TO PROCESS SUGARS AND STARCHES EASIER.**
- **MAKES DRY FORAGE SAFER FOR INSULIN RESISTANT HORSES.**
- **FAT HORSES GET THINER .**
- **THIN HORSES GET FATTER.**
- **ALL HORSES GET HEALTHIER!!**

~WARNING! ~

This product should be used with a quality hay ring designed for equines.

This product should not be used with animals with halters or any head gear with buckles.

A solid barrier all the way to the ground should be between shod hooves and netting.

This product should not be used with horned animals!

FAQ's

How will my horse react to the net?

At first, your horse may be mad at the net for making him work for his hay, but after a day or two, most horses will stop trying to bite through the net and will settle down to pulling it out with their teeth or their lips.

Do I need to keep tension on the net?

No, as the hay is eaten down, the body of the net becomes looser and looser...the horse handles this very well by nuzzling the net until he finds his bite of hay.

Will the horse bite through the net?

Occasionally an equine will bite through the net. They will not ingest the net, just break the thread. If this should happen, take any baling twine or small cord and close the hole. This does not happen very often, but it can, on occasion, so check your net daily.

Can my horse get tangled in the net?

Anything that can get caught in the net should be removed from the head and a solid barrier should be between this net and a shod hoof. This net is very strong and a horseshoe WILL catch in the net. Please take safety precautions by placing a barrier between shod hooves and this net and removing any head gear with buckles. Fly masks, for example are okay.

How long will the net last?

These nets have an added UV protection and should last at least a year.

Are the nets guaranteed?

If you are not satisfied with the net, it may be returned for a full refund (less shipping) anytime in the first 90 days with proof of purchase.
